

Kidney Health Evaluation for Patients with Diabetes (KED)

Measure Description

The percentage of members 18 - 85 years of age with diabetes (type 1 and type 2) who received a kidney health evaluation, defined by an estimated glomerular filtration rate (eGFR) and a urine albumin-creatinine ratio (uACR), during the measurement year.

- ✓ The measure is a weight of (0.5) star and is part of the **STARs P4P Incentive Program**

Measure Requirements

- At least one eGFR is required during the measurement period
- At least one uACR is required during the measurement period
 - The uACR is identified by the member having both a quantitative urine albumin test and urine creatinine test with service dates four or less days apart
- Care must be captured administratively for the KED Measure. Medical record submission will not count.

Call to Action

- Routinely** refer members with a diagnosis of type 1 or type 2 diabetes out to have their eGFR and uACR.
- Follow** up with patients to discuss and educate on lab results.
- Educate** on how diabetes can affect the kidneys and offer tips to your patients on preventing damage to their kidneys.
- Coordinate** care with specialists such as an endocrinologist or nephrologist as needed.

Exclusions

- Members with evidence of End Stage Renal Disease (ESRD)
- Members who are in Palliative Care will not be included in the measure

Exclusions (Optional)

- Members who do not have a diagnosis of diabetes in any setting during measurement year or prior
- Members who had a diagnosis of polycystic ovarian syndrome, gestational diabetes or steroid-induced diabetes during measurement year or prior.

2023 Codes	
Description	CPT
Estimated Glomerular Filtration Rate Lab Test	80047; 80048; 80050; 80053; 80069; 82565
Quantitative Urine Albumin Lab Test	82043
Urine Creatinine Lab Test	82570

Please **fax** medical records to **877-741-9186**
